

Challenges & Objectives

Aeronautic is a very competitive and very hard business. In order to sustain, **Airports challenges** are to meet ambitious objectives in terms of **operational performance, profitability** and **environment** in a new **Global Reporting Format safety** context and **digital transformation** context.

Run[waiz]™ objective is to improve the runway condition assessment using **aircraft braking report** and latest advances in intelligent processing.

- ✓ Decision making tool (CDM/APOC)
- ✓ Runway conditions assessment map
- ✓ In real time
- ✓ Trust Indicator

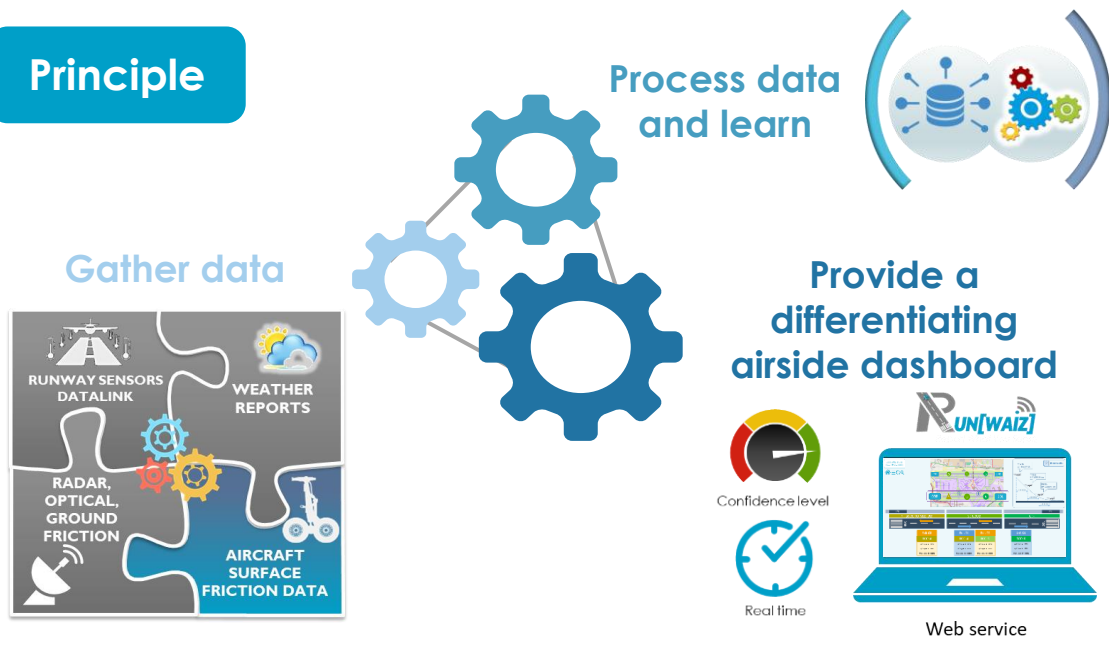

- ✓ Aircraft braking data
- ✓ Airport ground data

In few words

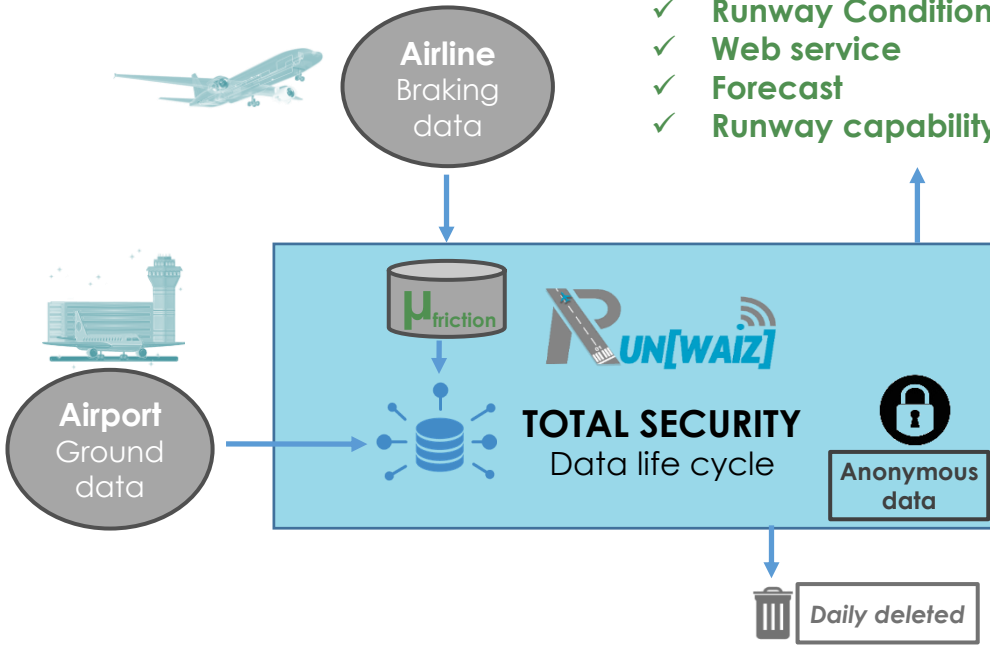

- ✓ Customer : Airport operations
- ✓ Users : Airports & Airlines

Principle

In the race for innovation, the ability to control what is happening in real time is a real competitive advantage, offering tremendous leverage to make decisions and act quickly.

CDM: Airport and Airlines collaboration

SAFRAN
Expert & World leader in Braking Systems

Multi-model compatibility aircraft

Run[waiz]™ Strengths

Reliability
Aggregating several input data sources

SAFRAN
Expert in flight data management

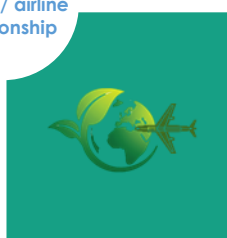

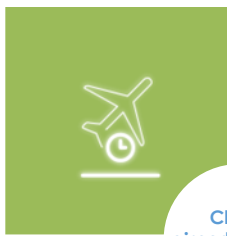

Join the community!

Airports benefits

OPERATIONAL PERFORMANCE

- Runway closure optimization
- Targeted maintenance
- Standardized data
- Digitalization
- Runway excursion reduction
- High speed taxi slip. optim.
- Reliable data
- GRF compliance

SAFETY

Closer airport / airline relationship

PROFITABILITY

- Occupancy time optim.
- Less flight delays
- De-icer savings
- Less guesswork

- Reduction of CO2 emissions
- Less chemical use
